

CLARITY-BPA:

Data integration, analysis and interpretation of eight academic studies

Jerrold J. Heindel, Scott Belcher, Jodi A. Flaws, Gail S. Prins, Shuk-Mei Ho, Jiude Mao, Heather B. Patisaul, William Ricke, Cheryl S. Rosenfeld, Ana M. Soto, Frederick S. vom Saal, R. Thomas Zoeller

Healthy Environment and Endocrine Disruptor Strategies (HEEDS.ORG), Commonwealth

CLARITY-BPA: Overview

Consortium
Linking
Academic and
Regulatory
Insights on the
Toxicity of
BPA

- A new collaborative model

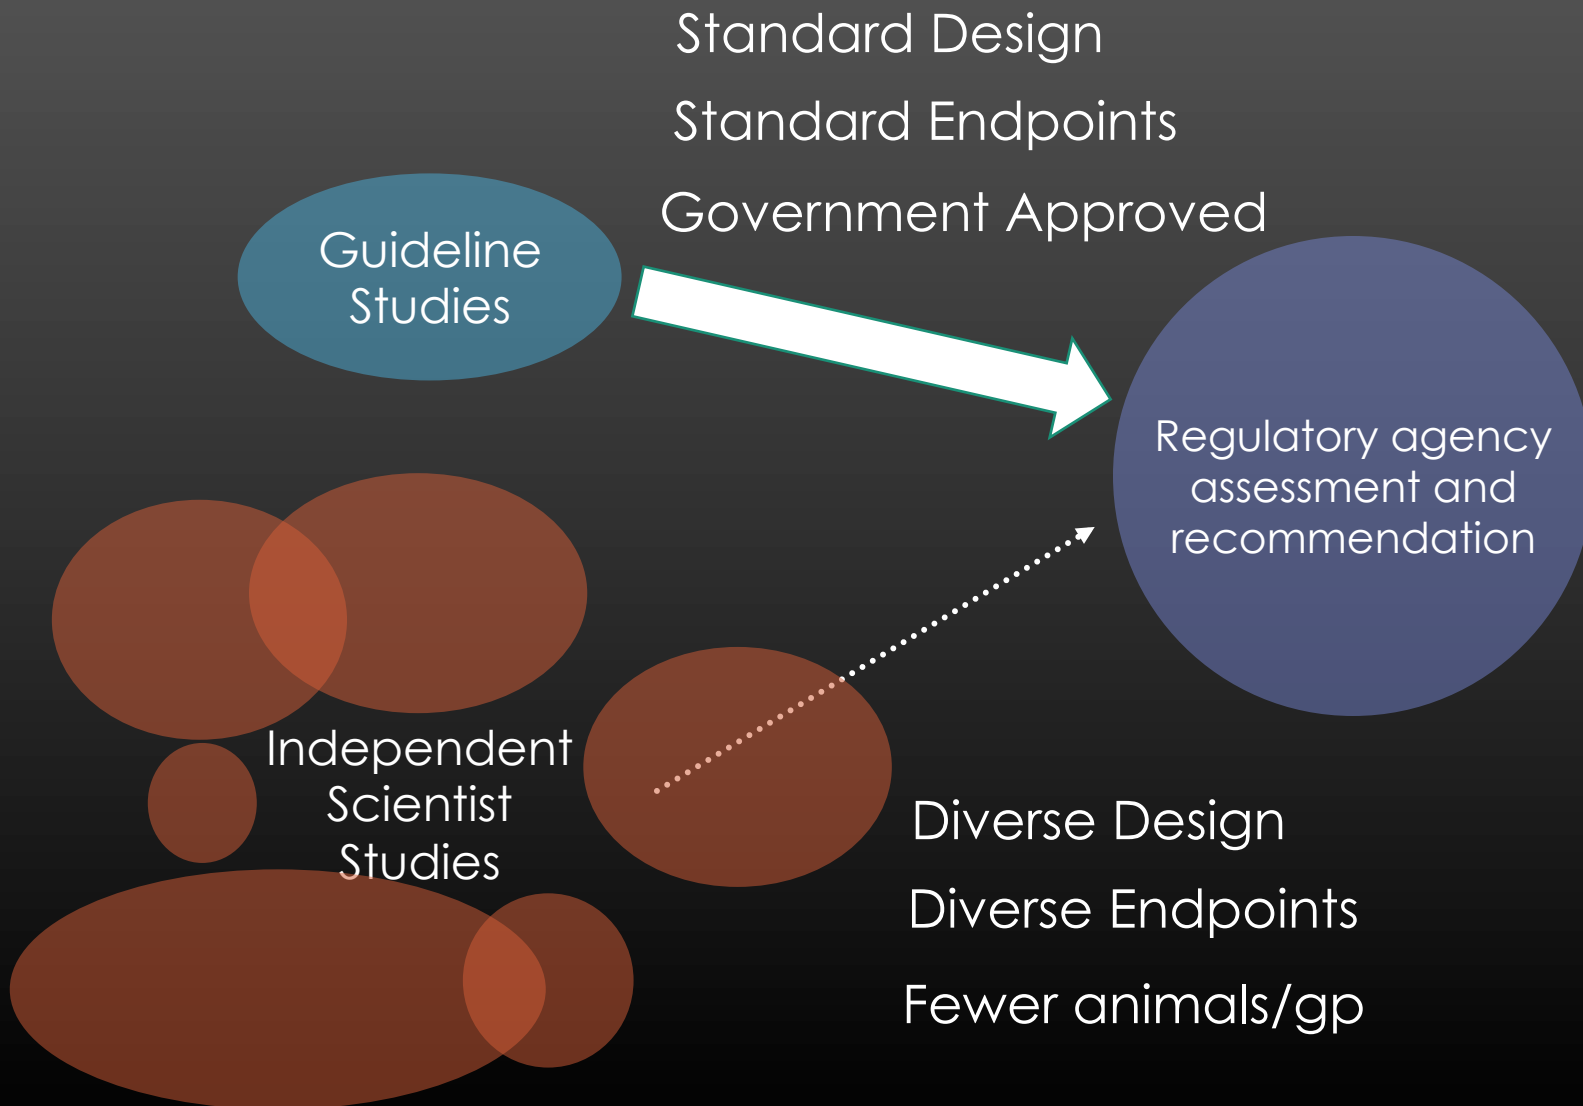

Goals:

- Integrate strength of guideline study with molecular and disease associated endpoints from independent scientists into one study.
- To improve safety assessment.

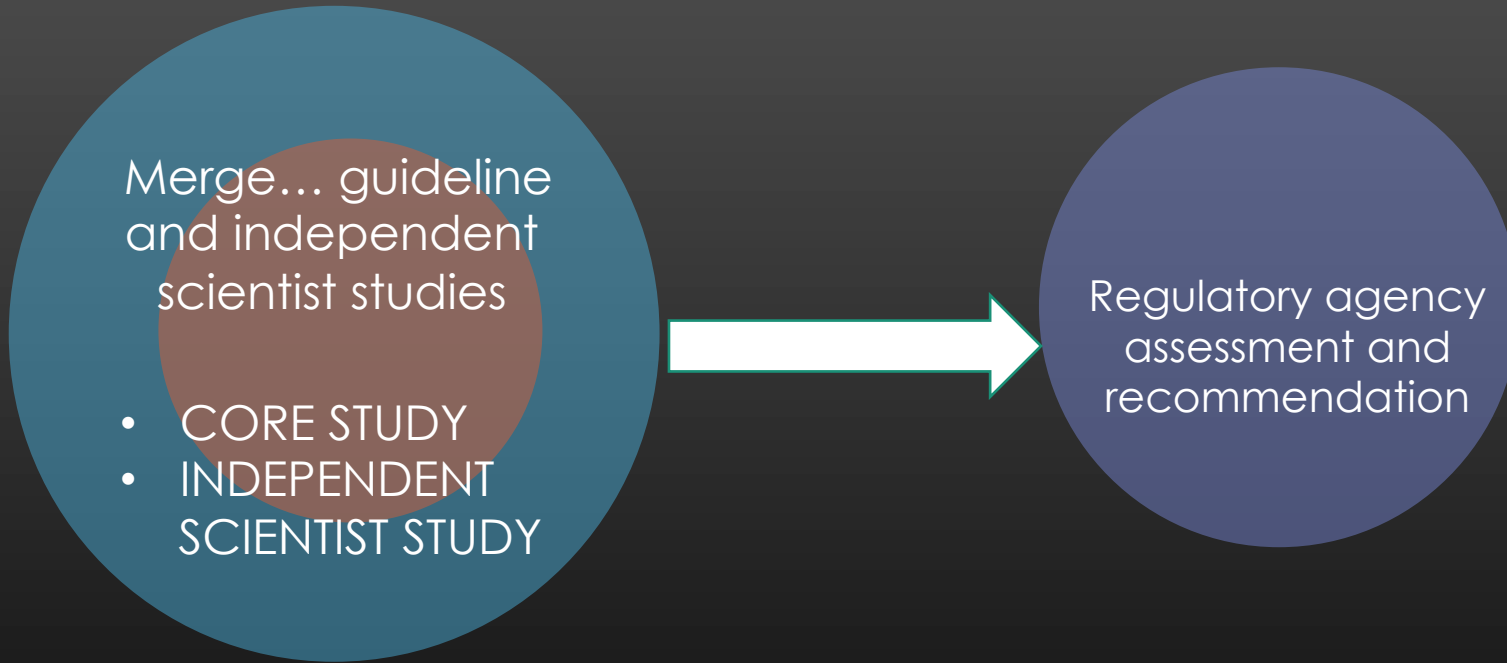

Partners:

- NIEHS NTP and Extramural Grants Program
- FDA NCTR and CFSAN
- 14 NIEHS-funded academic grantees

Current Approach to Risk Assessment

CLARITY Approach to Risk Assessment

Government approved design

More comprehensive assesment of toxic effects

CLARITY-BPA: Study Details

Sprague Dawley rat

FDA-Core Study

50 animals/dose

Independent Scientist Studies

~10 animals/dose

Dose Groups
($\mu\text{g/kg bw/day}$)

Vehicle only

BPA

2.5

25

250

2,500

25,000

EE₂

0.05

0.5

Route of Administration

Gavage: GD 6-Birth,
PND 1 to PND 21
OR 2 years

Endpoints

FDA-Core Study

Clinical chemistry
Sperm parameters
Histopathology of all tissues
Estrus cyclicity
Body weight
Organ weights of selected tissues

Independent Scientist Studies

Prostate

Fred vom Saal
Gail Prins

Testis function

Kim Boekelheide

Penile dysfunction

Nestor Gonzalez-Cadavid

Cardiovascular

Scott Belcher

Immune function

Norbert Kaminski

Breast cancer

Ana Soto

Uterine cancer

Shuk Mei Ho

Ovarian function

Jodi Flaws

Obesity

Nira Ben Jonathon

Diabetes/liver

Andrew Greenberg

Thyroid function

Tom Zoeller

Brain

development

Cheryl Rosenfeld

Heather Patisaul

Publication Status

- Core guideline study
- 10/14 independent/academic studies
- No integrated publication of all the independent studies
- No integrated publication of all CLARITY-BPA data, core and independent scientist

Today: *Unique Manuscript*

- This is a final report of 8 independent/academic studies that presents their data and puts it in perspective to previously published data

AND

- Integrates all the findings and interprets them as a whole.

Independent Scientist Studies
Published, NOT INCLUDED

Testis function
Kim Boekelheide

Immune function
Norbert Kaminski

Independent Scientist Studies
NOT PUBLISHED

Diabetes/liver
Andrew Greenberg

Obesity
Nira Ben Jonathon

Penile dysfunction
*Nestor Gonzalez-
Cadavid*

Uterine cancer
Shuk Mei Ho

Independent Studies Included

Prostate Cancer/Stem cell
Progenitor numbers
Gail Prins

Male Urogenital abnormalities
Fred vom Saal, William Ricke

Cardiovascular Function
Scott Belcher

Mammary Gland
Development/Cancer/ Nature
of Dose Response
Ana Soto

Ovarian function
Jodi Flaws

Thyroid Function
Tom Zoeller

Learning and
Behavior/transcriptomics
Cheryl Rosenfeld, Shuk Mei Ho

Behavioral Changes/Brain
transcriptomics
Heather Patisaul

Data Integration Across Organs/Dose
and Time
Cheryl Rosenfeld, Juide Mao

Manuscript Organization

- For Each Organ System
 - Previous Publications
 - Hypothesis
 - Methodology
 - Data Summary
 - Discussion
 - Major Findings
 - Compare to Previous Publications
 - Study Differences
- Data Integration across organs, dose, time
- Discussion of data integration
- Final integrated Discussion

Presentations...

- Gail Prins, U Illinois Chicago

Prostate Cancer/Stem Cell Progenitor number

- Ana Soto, Tufts University

Mammary Gland Development/Cancer/Nature of the dose response

- Cheryl Rosenfeld, University of Missouri

Integrated Data Across Organs/Doses/Times

- Gail Prins, U Illinois Chicago

Summary and Key Messages
